

Location: _____

**MI-700, MI-701,
MI-702**

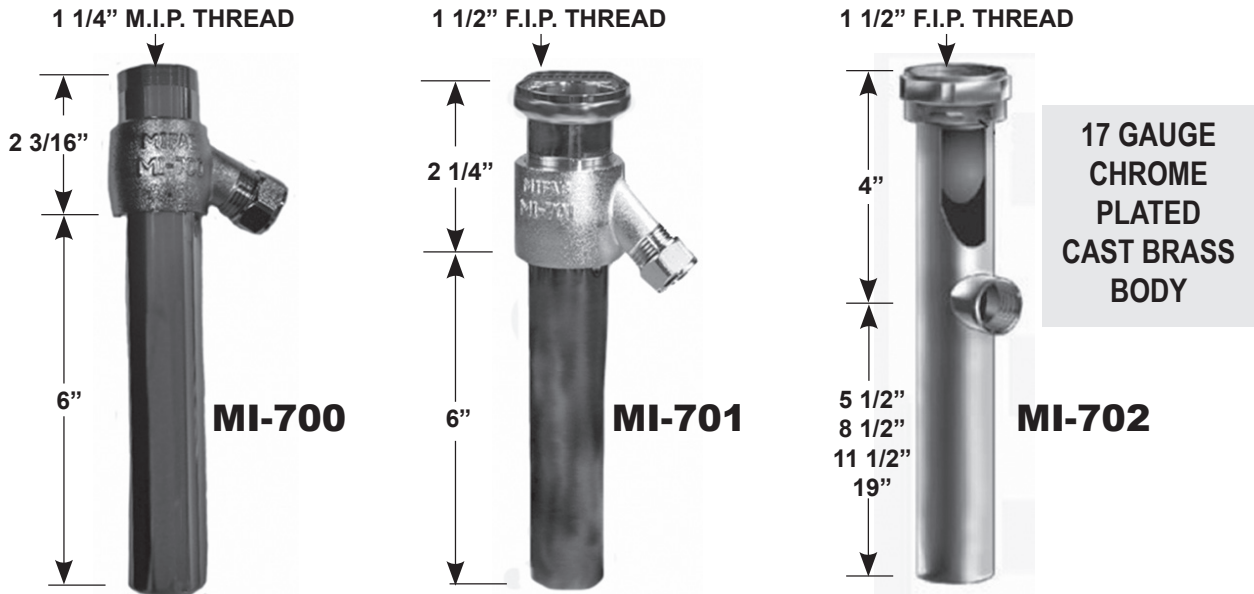

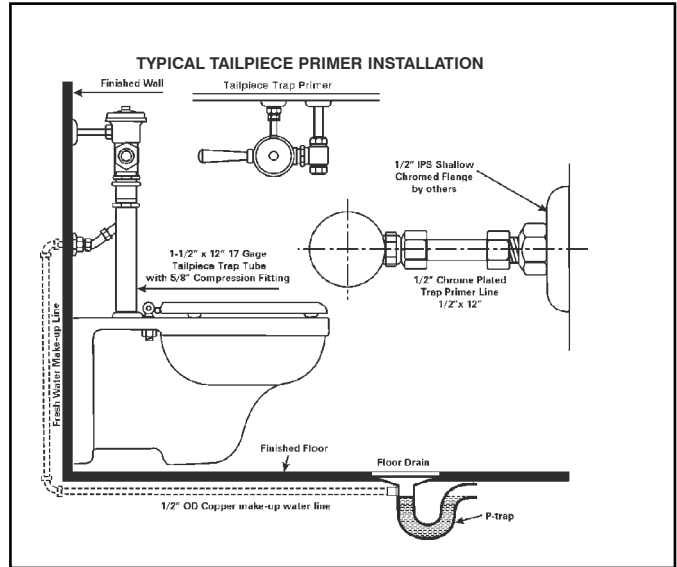

**GRAVITY FED TRAP
SEAL PRIMERS**

Specification: MIFAB's MI-700 Series trap seal primers are engineered to prime one floor drain trap that is no further than twenty feet from the fixture. A 1/2" (13) O.D. copper make-up water line connecting the trap seal primer to the floor drain trap is recommended for the M-700 & MI-701.

Function: MIFAB's MI-700 Series of tailpiece trap seal primers replace the standard flush valve connection to provide a fresh water discharge to replenish the floor drain trap seal. Three ounces of water will flow through the priming tube connection each time the flush valve operates.

Installation: MIFAB's MI-700 Series of tailpiece trap seal primers are engineered to prime one floor drain trap that is no further than twenty feet from the flush valve primer. A 1/2" (13) O.D. copper make-up water line connecting the tailpiece trap seal primer to the floor drain trap is recommended. It also serves lavs, sinks, and flush valves.

Note: S.S. braided supply pipe w/escutcheon is available for the MI-702 (option -BH).
